Description: 2This two-level barn is covered by a standing seam gable roof with shed extensions on the east and west sides. The barn is clad with horizontal board siding and is set on a foundation of brick piers and concrete blocks. Sliding doors on the north, west, and east sides give access to the stalls on the lower level. Two shed-roofed additions, constructed on the south end of the barn, are clad with T-111 siding. Barn doors on the west side of the shed additions open to the stalls inside. Two small, round, metal silos are located between the barn and the road.

Primary Resource? ..... No
Number of Stories: 1.0
Interior Plan Type: .....
Threats to Resource: ..... Transportation Expansion
Description: This one-story, concrete block machine shed, located southeast behind the house, is covered with a gable roof of 5-V crimp metal with horizontal board siding in the gable ends. A sliding door on the west side opens into the large equipment storage space on the north end of the shed; an enclosed office area is located on the south end and is accessed by a door on the west side of the building.

WUZIT: ..... Kitchen

Est. Date of Construction: .... 1900 ca {Site Visit}
Accessed? ..... No
Primary Resource? ..... No
Number of Stories: 1.0
Interior Plan Type: .....
Threats to Resource: ..... Transportation Expansion
Description: This one-story frame building, located east behind the house, may have been a kitchen wing that was attached to the rear of the house. It is covered by a front-facing, metal-clad gable roof, is clad with weatherboard, and has a door on the west end. A brick chimney is located on the east end of the building, and six-over-six wood sash windows are located on the north and south sides. The kitchen is set on brick piers. A shed-roofed addition that holds two horse stalls is located on the east end. The stalls are clad with horizontal and vertical board siding.

Architectural Style:	Late 19th and Early 20th Century A	*Condition:*	Fair
Interior Plan Type:		*Threats to Resource:*	Transportation Expansion

Description: This two-story, three-bay, frame I-house is covered by a side-facing gable roof of standing seam metal with a front gable wall dormer that features shaped wooden shingles and decorative scrollwork brackets. The house is clad with vinyl siding, which covers the house's foundation. The one-story, three-bay front porch is covered by a hipped roof that is supported by wooden Doric columns. Fixed and sliding glass doors have been installed between the columns, enclosing the front porch. The centrally located entrance has a three-light transom above and two-pane sidelights. The entrance is flanked by two-over-two wood sash windows. Brick chimneys are located near the north and south ends of the roof ridge. Other details include decorative cornice brackets, shaped shingles in the gable ends, and gable end returns.

A one-story, gable-roofed ell has been constructed to the rear (east) of the house. The ell is set on a foundation of concrete block, is clad with vinyl siding, and has wooden decks located on the north, south, and east sides.

Cemetery Information

Bridge Information

National Register Eligibility Information (Intensive Level Survey)

Historic Time Period(s):..... P- Reconstruction and Growth (1865 to 1914)

Significance Statement: This late-nineteenth century, Victorian-style I-house is typical of others found in the region and in the nearby town of Windsor. Although exhibiting Victorian-era detailing in the use of shaped shingles and scrollwork, material changes have been made to the house including the installation of vinyl siding and the enclosing of the front porch. The outbuildings, likewise, are of common design, construction, and materials. The resource has no apparent association with any event or person important in our nation's history and does not appear to have the ability to yield important information. For these reasons, the resource is recommended as not eligible for the NRHP under Criteria A, B, C, or D.
